Digital Photography

\$109

This course focuses on the technical aspects of working with digital images and is useful both professionally and for personal enrichment. We provide some tips on improving your general skills in taking digital photographs, but the main thrust is learning how to manipulate images, create special effects, and how to save and send photos over the Internet. Bring your camera, the instruction book, and some saved photos. Prerequisites: basic computer and emailing skills. Familiarity with Adobe Elements or Photoshop are also helpful.

Nature Photography

\$129

Would you like to learn more about how to compose photographs so that you can bring home the image that you saw while taking a hike, traveling, viewing a beautiful sunset, or capture an evening setting? In this class, the instructor will focus primarily on how to compose photographs so that you are comfortable taking pictures wherever you are. You will go through camera settings and how they affect your photograph. Bring your SLR or DSLR camera (no snapshot cameras). Plan to shoot 20-30 pictures (equivalent of one roll of film) each week. A Saturday field trip will be included as a substitute for one of the classes.
